

Hints

for Magento® 1

User Guide

User Guide

To enable module go to “System->Configuration->Mageinn->Attribute’s Hints” section.

You can create your own template for module and use it instead of default. If you want to do that please set "Use Default Templates" parameter to "No" and change appropriate template path to point to your custom template.

The screenshot shows the Magento Admin Panel interface. The top navigation bar includes links for Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, and System (highlighted). Below the navigation bar, there is a message about the Base Unsecure URL / Base Secure URL configuration. The left sidebar shows the 'Configuration' section expanded, with 'Attribute's Hint' selected under the 'MAGEINN' category. The main content area displays the 'Attribute's Hint' configuration page, which includes a 'General' tab with the following settings:

Field	Value	Store View
Enabled	Yes	[STORE VIEW]
Layer Filter Template	mageinn/catalog/layerfilter.phtml	[STORE VIEW]
Use default templates	Yes	[STORE VIEW]

Below the 'Layer Filter Template' field, there is a note: "If changed, please use the following code in your template: \$this->getOptionHintHtml(\$_item->getValue());".

Hints for Attributes

1. Module allows you to set custom hints for attribute's title. Select "Hints" tab in attribute edit page and add hint for attribute using WYSIWIG editor.

Color or colour (see spelling differences) is the visual perceptual property corresponding in humans to the categories called *red*, *blue*, *yellow*, and others. Color derives from the spectrum of light (distribution of light power versus wavelength) interacting in the eye with the spectral sensitivities of the light receptors.
